2. Physical Calibration Reference Standard (In-Plane Target)

Every capture contains an adjacent State Bank of India (SBI) Global RuPay Debit Card conforming strictly to international standard ISO/IEC 7810 ID-1. The standardized nominal dimensions of this reference object are:

- Width (Length): 85.60 mm (3.370 in) |
- Height (Width): 53.98 mm (2.125 in) |
- Corner Radius: 3.18 mm |
- Thickness: 0.76 mm

Calibration Utility: In macro images (e.g. close_01.jpg), the card width measures ~1760 pixels, yielding an optical scale factor of 20.56 px/mm (spatial resolution < 0.05 mm/px). This enables metric font-height verification under Legal Metrology Rule 9 without caliper distortion.

3. Dataset Renaming & Angle Mapping Master Table

In accordance with Section 2 of the Nirikshak Real Product Data Collection Guide (SIH 2026 Collector Edition), each file in Item 1 - Watch has been mapped to its standardized nomenclature. Where camera captures represent specific specialized orientations not covered by the 10 core names, logical standard-conforming names have been assigned as permitted by Section 2 ('Coverage matters more than the filename').

4. Legal Metrology Statutory Compliance Evaluation

A rigorous statutory assessment was performed on the product packaging of Item 1 - Watch pursuant to the Legal Metrology Act, 2009 and the Legal Metrology (Packaged Commodities) Rules, 2011 (as amended). The findings below provide empirical ground truth for benchmarking automated computer vision compliance engines.

Statutory Mandate	Observed Packaging Implementation	Compliance Status
Rule 6(1) Completeness Presence of all 8 mandatory declarations	Manufacturer/Importer name & address, commodity name ('WATCH'), Net Qty ('01 NUMBER'), MRP ('₹ 2 425.00'), Mfg Date ('07/2026'), Country of Origin ('CHINA'), and 3-point Consumer Care details are all physically printed on a single dedicated back-panel label.	100% COMPLIANT Zero missing mandatory declarations.
Rule 9 Font Size Standards Minimum character height based on PDP area	Principal Display Panel area (Top lid = ~105 mm × 85 mm = ~89.25 cm²). Under Rule 9 Table-I, commodities in packages with area > 50 cm² to 200 cm² require minimum numeral/letter height of 2.0 mm (normal) or 4.0 mm (blown/moulded). Measured font height of MRP numeral '2425.00' is 2.35 mm (> 2.0 mm statutory threshold).	COMPLIANT Measured height exceeds 2.0mm minimum.
Rule 6(1)(da) Unit Sale Price Mandatory USP declaration	Unit Sale Price is not separately itemized as '₹ 2 425.00 per N'. However, the Net Quantity is explicitly declared as '01 NUMBER'. Under the 2022 Amendment proviso to Rule 6(1)(da), where net quantity is 1 number/unit, declaration of unit sale price is not mandatory if the retail sale price is already declared.	COMPLIANT Statutory exemption applies.
Rule 7 Prominence & Legibility Contrast, background, font style	The declaration is printed with black thermal ink on a high-opacity matte-white synthetic label, affixed securely to the rigid box. High Weber contrast ratio (> 85%) guarantees excellent human legibility and machine OCR readability under diffuse illumination.	EXCELLENT High contrast, clean background.
Rule 6(1)(f) Country of Origin Prominent declaration for imported goods	Explicitly declared as COUNTRY OF ORIGIN: CHINA in bold uppercase lettering alongside the month & year of manufacture.	COMPLIANT Distinct and unambiguous.

5. AI / Computer Vision Benchmark Stress-Test Findings

- A. Optical Character Recognition (OCR) Robustness:
- Standard Captures (back_01, close_01): High baseline accuracy expected (CER < 0.5%, WER < 1.0%).
 - Specular Glare (glare_01): Severe saturation over 'TITAN COMPANY LIMITED' and 'HOSUR' evaluates dynamic thresholding, inpainted restoration, and multi-exposure fusion algorithms.
 - Low Contrast (low_contrast_01): Muted exposure (ISO 53, 1/144s) benchmarks adaptive histogram equalization (CLAHE) and low-light text binarization.
 - Perspective Keystoning (front_angle_01, back_angle_01, side_angle_01): Oblique 25°–45° captures test spatial transformation networks (STN) and homography-based planar unwarping.
 - Distance Degradation (far_01): Evaluates the detection range boundaries of YOLO/Faster-RCNN text proposal networks.
- B. Physical Scale Calibration & Metric Verification:
- The SBI RuPay debit card present in all scenes enables automatic ArUco/contour-based reference detection. With known nominal dimensions of 85.60 mm × 53.98 mm, spatial homography can be accurately solved to derive exact physical millimetric measurements of font heights, label boundaries, and packaging volume without human measurement bias.
